Office Action Summary	Application No. 10/534,421	Applicant(s) CHEN ET AL.	
	Examiner Paul Marcantoni	Art Unit 1793	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 15 September 2008.
- 2a) ☐ This action is **FINAL**. 2b) ☐ This action is non-final.

The applicants election of Group I with traverse on 9/15/08 is respectfully acknowledged. However, it would appear that an election of species is sufficiently required for the instantly elected claims:

This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows: A gel forming agent including amorphous silica, diatomaceous earth, silica fume, clay, cellulose pulp, or mixtures thereof.

Please elect a specific gel forming agent for examination. Note that silica fume is an amorphous silica. Please also note that the rules for election for species for US application and 371 filed applications appear to be essentially the same. The examiner examines the elected species and if not found and is allowable the search continues for the remaining species non-elected.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

Art Unit: 1793

are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: Diatomaceous earth and cellulose earth are materially different than clay and silica fume. Silica fume is an amorphous silica with a completely different structure than the other species that appear crystalline. Further, applicants admit that depending upon the starting calcereous material it matters for what will be the gel forming agent. Applicants state that clay appears to be most suitable and functional for lime but not the other species.
